HONORS & AWARDS

2023-2024: Merit-based Scholarship

SUMMARY

Second-year Information Technology student at Thu Duc College of Technology, passionate about fullstack web development using ReactJS, Node.js, and Laravel.

Experienced in real-world projects such as a medical booking system with authentication and real-time scheduling.

Actively seeking a front-end or fullstack internship to apply technical skills and gain hands-on experience in real-world development.

SKILLS

REACT.JS

Good understanding of building interactive user interfaces with React, including class components, component lifecycle methods, and the Context API.

JAVASCRIPT (ES6+):

Good understanding of modern JavaScript features such as ES6 syntax, async/await, promises, and basic knowledge of closures.

REDUX:

Basic knowledge of Redux for state management in React, with ongoing learning of middleware like Redux Thunk.

HTML5 & CSS3:

Good understanding of HTML5 and CSS3 for building responsive and accessible web pages. Familiar with CSS preprocessors such as SASS.

VERSION CONTROL:

Good understanding of Git for version control, familiar with branching, merging, and pull requests.

BACKEND & DATABASE:

Basic knowledge of Node.js and Laravel for building RESTful APIs. Experience in creating and consuming APIs in React applications. Familiar with database concepts and operations (MySQL).

PROJECT EXPERIENCE

WEB BOOKING CARE (REACTJS & NODEJS)

February 2025 - Present

Customer Academic Project

Team Size 2

Tech stack: ReactJS, Redux, Node.js, Express, MySQL, TailwindCSS

Position: Full-stack Developer (Student Role)

Responsibility:

- Developed a responsive UI using ReactJS and TailwindCSS. Managed app state with Redux.
- Built RESTful APIs (Node.js + Express) for booking, scheduling, and authentication.
- Used MySQL for data storage.
- Ensured smooth API integration between frontend and backend.
